The Medical University of Graz takes a holistic view of the human being. We are committed to supporting, accompanying and training the people entrusted to us and promoting their development. “Pioneering Minds—Research and Education for Patients’ Health and Well-being” is our common strategy and vision that keeps us moving forward.

*Become part of an extraordinary team—become a pioneering mind!*

## Tenure Track Professor of Translational Uro-oncology

### Department of Urology

Full-time position (100%); initially limited to 6 years, becoming a tenured position when the qualification agreement is met

We are looking for an excellent researcher with great potential to develop an internationally recognized research agenda in the field of translational research in uro-oncology.

The successful candidate is expected to conduct research and teaching in the fields of experimental cancer research in urology with a focus on personalized medicine in bladder cancer and immuno-oncology. The new position will complement the research activities of the already existing research areas, such as clinical trials, outcome and health services research, and focus on basic research and translational approaches.

The initial appointment is limited to six years. After the conclusion of a qualification agreement, the career advancement goal is to transfer to a tenured position as an associate professor (tenure track professor pursuant to § 99 para. 5 and 6 of the Universities Act). If the candidate demonstrates outstanding and remarkable achievements, the qualification agreement may be fulfilled more quickly.

### Core duties and responsibilities:

- Establishing a research group to advance basic and/or translational uro-oncology
- Teaching undergraduate and graduate courses, supervising diploma and PhD students, and mentoring and promoting young researchers
- Designing, acquiring, implementing, and managing funded research projects
- Cooperating on research that exploits the existing strengths of the department and other disciplines at the Medical University of Graz
- Writing and publishing high-quality scientific papers in reputable journals
- Establishing and maintaining networks through local, national, and international research collaborations
- Organizing and participating in conferences in the academic field
- Supporting scientific and public outreach in the research area (public lectures, media, etc.)

Successful candidates must have the following qualifications and skills:

- PhD degree in a relevant scientific field (pharmacy, molecular oncology, biochemistry, biomedicine, or similar)
- Profound research expertise in the field of bladder cancer
- Proven track record of high-quality publications and peer-reviewed research grants or other third-party funding as a lead or principal investigator
- Previous experience in teaching and/or (co)supervising pre- and postgraduate students (depending on the applicant's career stage)
- Postdoctoral research fellowship abroad or at a different institution than where the PhD was completed
- Experience in cutting-edge technologies, e.g. omics-technologies, cell culture and animal models
- Proficiency in spoken and written English documented by fulfilling the PhD-thesis in English

The ideal candidate has the following profile:

- Experience in setting up and leading a laboratory research group
- International collaborations
- Willingness to learn German
- Interdisciplinary and interprofessional cooperation
- Ability to work in teams and ability to inspire colleagues and students
- Responsible work habits, resilience, and ability to solve problems
- Good communicative and social skills

#### Application:

We are looking forward to your application via our online job portal:

<https://www.medunigraz.at/en/job-openings/tenure-track-professorships>

Application deadline: **22.05.2025**

Please note that we can only consider complete applications that have been received by the application deadline. A list of the documents to be submitted can be found [here](#). In addition to the aforementioned list, please ensure that your PhD thesis is uploaded.

Statutory information: The minimum remuneration is based on the collective agreement for university employees (KV § 49.2).

The scheduled date for job interviews: **02.07.2025 at the Medical University of Graz**

Contact: [rektorin@medunigraz.at](mailto:rektorin@medunigraz.at)

The Medical University of Graz is committed to increasing the proportion of women in management positions and encourages qualified women to apply. Among applicants with equal qualifications, female applicants will be given priority. We also welcome applications from qualified individuals with disabilities and encourage them to apply.
